

- Connect with academics with similar interests
- Develop collaborations (e.g., conference symposia)
- Share resources
 - grant applications
 - job talk materials
 - grad school personal statements

- Discover new literature
- Receive feedback on your work
- Crowdfund questions
- Solicit statistics advice
- Discussions with fellow conference attendees
- Observe discourse among prominent scientists

- Share your own research findings
- Promote colleagues' work
- Learn about job opportunities
- Engage with non-academic audiences
- Learn about processes in academia that are usually opaque
 - how do search committees work?
 - how many peer review requests should I be accepting

GETTING STARTED

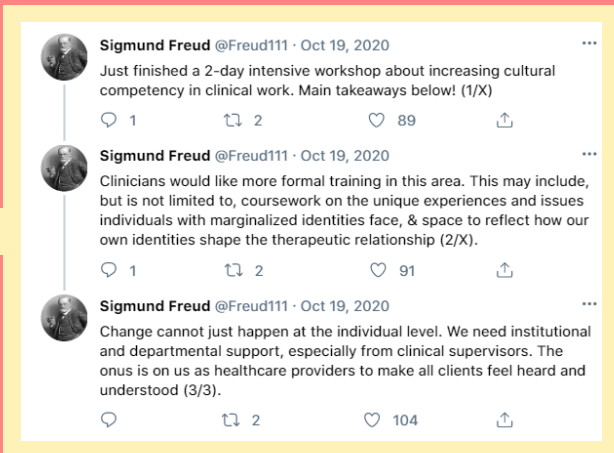

- Create a bio

Common to include:

- Current position
- Research interests
- Fellowship status
- Prior affiliations
- Non-academic fun facts
- Link to your website

WAYS TO TWEET

- **Tweet:** original content, limited to 280 characters
- **Retweet:** share others' tweets with your followers
- **Quote Tweets:** share others' tweets *and* add your own commentary
- **Reply:** comment on someone else's tweet
- **Threads:** ways to share content greater than 280 characters

TWEETING FOR BEGINNERS

- Follow people with similar interests
- Read! Get comfortable by consuming others' tweets and threads
- Dip your toe in the water - retweet others' tweets
- Comment on a twitter thread
- Congratulate colleagues

- Live tweet a conference talk
- Share good (and not so good) news

TIPS & TRICKS

- Before tweeting, evaluate how you would feel if your department or prospective employer saw your content.
- Tone (e.g., sarcasm) can be hard to read.
- Decide on a personal/professional balance you feel comfortable with.
- Don't get sucked into twitter arguments with the trolls! Sometimes best to block and move on.
- Limit complaining: while tempting, it may not be the best place to gripe about your department or bemoan the undergraduates in your recitation.
